New babies this month	19
Deceases last 3 months	13
TOTAL	315

Workers

Name	Role	salary
Esteban Hernández	supervisor	17
Jorge Maldonado	worker	12
Martha rea	cleaner	4
David perez	Night keeper	12
Farm lease		30
TOTAL EXPENSE		75

Food report

Each hen needs 100 gr of food per day, 50 gr in the morning, 50 gr in the evening

Daily consumption: 315 times 100gr = 31500gr 31.5Kg per day

productivity report

Chicken productivity has decreased in the last months having each chicken produce 1 egg per day since they already are 1 year old.

We created a plan to have chickens produce new babies while they still can. Having the older chickens lay with eggs and have more babies.

Egg report

currently we have 120 hens producing 1 egg per day in some cases 2 eggs per day. We often get to have from 4 to 5 cartoons per day.

How we sustain the farm

Currently the value of a cartoon of eggs is 2.5 usd , so we get a profit ranging from 10\$ to 12.5\$, money we use to buy food for all the chickens

Food expense

Each bag has 40 kg of food and the cost ranges from 14\$ to 17\$ (depending on the store)
